High Grade Orange Trees

Grafted Paper Shell Pecans

PRICE LIST 1906-07.

V. L. BEYER, Proprietor.

CITRUS FRUITS.

All our Trees are Budded on the hardy Citrus Trifoliata.

CITRUS TRIFOLIATA. In the more northern orange-growing sections, where Jack Frost occasionally makes his raids, it is necessary to take all possible precautions against his ravages. One way to do this is to plant trees budded upon Citrus trifoliata stock. The Citrus trifoliata is entirely hardy as far north as Washington, D. C., and all varieties of Citrus when budded upon it, will stand more cold than upon any other stock. All varieties budded on it come into bearing at an extremely early age, and the fruit ripens up one to three weeks earlier in the season than the same variety on other stocks.

On account of its having been extensively used as a stock for trees grown in pots and tubs—for which it is particularly adapted—many people think that trees budded on it are very much dwarfed and slow of growth, but this is erroneous. In our test orchard, comprising some twenty odd varieties of Citrus—four trees of each, two on Sour and two on Citrus trifoliata, planted alternately—it would be practically impossible for any one not familiar with the arrangement to pick out trees of some varieties on Citrus trifoliata from those on sour, while all of the trees on Citrus trifoliata have made good growth.

As a hedge plant, its vigor, hardiness, resistant qualities and stout sharp thorns make it especially valuable. It forms and impenetrable barrier to man and beast, and with proper care can be rabbit-proof.

KUMQUAT.

Kumquats are eaten whole, rind and all. Preserved in sugar or crystallized, they make a very delicious confection which is very agreeable to most palates. Prices on Kumquats on Citrus Trifoliata and Rough Lemon stocks:

	each	per 10	per 100
1-year buds, about 1½ to 2 feet, stocky	\$.35,	\$3.00,	\$25 00
2-year buds, about 2 to 3 feet, stocky50,	4 50,	40.00
3-year buds, 3 to 4 feet, very fine, bearing size	1.00,	8.00,	70.00

ORANGES.

St. Michael's Blood. One of the best of the blood oranges. Fruit medium size, almost round, with thin but tough skin; pulp juicy, melting, rich and exquisite flavor, being unsurpassed in quality. Is a regular bearer, vigorous and nearly thornless.

Satsuma. Of medium size; flattened, loosely adhering and easily separated segments like all other varieties of the Mandarin type. The color is not red like King and Tangerine, but of a deeper yellow than Mandarin; flesh fine grained, tender, juicy, sweet and delicious; entirely seedless. Ripens in September, October and November. On account of its extreme earliness, good appearance and excellent quality, it brings a high price in the market. Tree of somewhat smaller growth than other oranges, and is of unique habit. Bears when very young. This is undoubtedly the hardiest known variety of edible orange, and this in connection with its early ripening and fine quality makes it an exceedingly valuable sort.

We can furnish the Satsuma on rough lemon and Citrus trifoliata, but do not grow it on sour stock. It succeeds much better on rough lemon stock than on sour, while on the entirely hardy Citrus trifoliata the inherent hardiness of the Satsums is still further enhanced. We nearly always have this in fruit in the nursery rows and can furnish trees of bearing size.

	each	per 10	per 100	per 1000
1 to 2 feet, straight stems	\$.30	\$2.50	\$20.00	\$175.00

PECAN TREES.

By special arrangement with Mr. H. F. Russell we are able to furnish direct from his nursery trees that are grafted direct from the ORIGINAL BEARING SEEDLING TREES of the RUSSELL and MAY RUSSELL. A little higher in price, but genuine goods.

MAY RUSSELL.

NEW—A GRAND PECAN.

Size large, ranging from 40 to 60 per pound. Form long, ovate, with conical apex, color golden brown with few purple splashes toward apex. Shell thin. Kernel long, slender, bright texture, fine grain. Flavor delicate, sweet and rich. Quality very best. Tree a vigorous, upright grower.

The original May Russell tree began bearing at an early age and has continued to increase its yield every year without any interruption. The trees we offer are the first ones put on the market and are grafted from ORIGINAL tree by the owner. A very limited number of trees are for sale this season.

ORIGINAL RUSSELL.

Size medium to large, running about 45 to 60 nuts to the pound. Form compressed ovate conical, with pointed base and sharply conical apex. Color rather dark grayish brown, with a few purplish splashes toward apex. Shell very thin—a true Paper Shell—cracking very easily. Partitions thin and soft, kernel bright, oblong, symmetrical, releasing the shell easily; flavor delicate and rich, quality very best. Our best dessert nut.

PRICES.

MAY RUSSELL AND RUSSELL.

20 to 30 inches	each \$1.15,	per doz \$12.00	per 100 \$ 90.00

Extra large, \$2.50 each.			

SUCCESS, a few only, at \$1.50. \$2.50 and \$3.00 each.

PABST. Soft shell, large, well filled, splendid and constant bearer. Considered the best of table nuts.

STUART. Soft shell, crisp meat. As good as any.

VAN DEMAN. Soft shell, fine meat. A very desirable variety, being the best of all Louisiana nuts.
